Hello! the default font is Helvetica (set using \usepackage).

Is this \LaTeX{} now in the default font? Not yet. Needs \texttt{rmfamily} to be called.

Now it is \LaTeX{} in the default font.
It stays this way for now.

Now back to the Helvetica.

Change fonts again! This time using \texttt{selectfont}!

Now in Palatino.

In sans serif now. May be I should get a job ....
