INSTRUCTION AND COURSE EVALUATION SCORES

Legend for the Table of Course Evaluation Scores (see next page):

Ev/Tot: number of students filling evaluation survey (Ev) / total enrollment (Tot). Survey questions are Q1: instructor's preparation, Q2: instructor's explanations, Q3: quality of interaction, and Q4: overall impression (**scores out of 5.00**). †: Undergraduate/graduate (466/566) level classes taught conjointly; material covered at graduate level, with 466 students graded on a lower curve (# students in 466/566 was 2/8 in Fall 2006). ‡: Replaced by substitute instructor after 8 weeks due to health reasons, and hence not evaluated. §: Taught jointly with two other instructors; evaluations reported separately for each instructor. ¶: Course taught via videoconferencing to remote and local locations. p/v: Pullman/Vancouver (p+v: offered concurrently in both campuses; not color-coded when evals from both locations are combined). ↓: A new online evaluation system was adapted starting in Fall 2015, with a longer survey. The overall mean/median score for the instructor and course are listed, along with scores for questions Q1–Q3. ¶: Results not reported if number of students taking survey is too small. *: Math 524 was taught as Math 581 (Topics) in Falls 2015 and 2017; and Math 529 was taught as Math 574 (Topics) in Spring 2012, 2014, 2016, and 2018.
