Peer Review Assignment 1

Directions: Your first assignment in this class is twofold. First you must find me in my office hours in the MLC and second you must find me in my office hours in Neil 224. During each encounter you must ask me a question relating to Mathematics, and in particular I would like one related to your homework. Could be as simple as "How do I do this problem?". We will then go over a problem and I will initial your paper for that visit. Don’t forget that this homework is due this Thursday May 14th.

1. MLC VISIT
